

# T70 System Specifications

70 Gallon Tote-A-Lube Tanks maintain fluid dryness and cleanliness. Designed as a reliable and more efficient storage solution than 55 gallon drums, our transparent Tote-A-Lube tanks allow easily monitoring of the stored

liquid volume. Our tanks require only (1) SPCC compliant secondary containment per stack vs containment for each 55 gallon drum. Stack up to (3) 70 gallon tanks high to create a multi-fluid storage and dispense system. 70 gallon tanks can also be stacked with other Tote-A-Lube tank sizes. Tanks can be customized with additional openings in either the top or sides.
